Objective: Web Developer

Employment Experience

Freelance Web Developer (Late 2008-Current)

- > Design and Implement an equipment rental system for researchers of a laboratory. The system uses PHP, MySQL and JQuery (for AJAX and layout effects).

Web Programmer (2007-2008)

Aire'd Ideas Inc., Vancouver, BC – a company which provides web solutions for art galleries in North America

- > Implement designs created by graphics designers and ensure the websites are cross browser compatible
- > Answer clients phone calls and provide technical support
- > Convert data from different databases to MS SQL 7.0
- > Help migrating the 7-year old ASP based CMS system to a newly created PHP based CMS system
 - Design and implement a user-friendly templating system based on smarty technologies to obtain data from MySQL database
 - Create custom smarty functions so that clients who have limited programming skills can create their webpage by calling functions
 - Ensure that the transition process is as smooth as possible

Graphics Designer (2005 – 2006)

Ming Pao Daily, Richmond, BC – one of the largest Chinese newsprint company in North America

- > Design the layout of text and graphics advertisements
- > Work under very tight deadlines

Freelance Web Developer (2005 - 2006)

- > Implement a web order status checker and programming-free administration for a wedding card printing company with PHP
- > Layout of Hong Kong Wah Yan College Alumni Association (Vancouver branch) special event website (online registration section)

Profile

- > Completed Computer Science Degree (UBC)
- > Strong programming and graphics skills
- > Creative problem solver
- > Attention to details
- > Ability to speak and write in English, Cantonese and Mandarin
